

To use the MKAnnotation class, what must be added to the code below?

```
@interface ExampleClass ()  
@property (strong, nonatomic) MKAnnotation *annotation;  
@end
```

```
@implementation ExampleClass
```

```
@end
```

```
@import MapKit;
```

How do you set what part of the map is shown in a UIMapView?

```
UIMapView mapView;  
MKCoordinateRegion viewRegion;  
  
[mapView ...];
```

```
[mapView setRegion:viewRegion];
```

Assume we're using the NetworkManager class from the homework, how do you set the delegate to the class below?

```
@interface CitiesTableViewController <CitiesTableViewControllerDelegate>
@end

@implementation CitiesTableViewController

- (void)viewDidLoad
{
    [super viewDidLoad];
    ...
}

@end
```

```
[NetworkManager sharedNetworkManager].delegate = self;
```
