What is being compared here?

```
UITextField *aTextField;
UITextField *anotherTextField;

if (aTextField == anotherTextField)
{
}
```
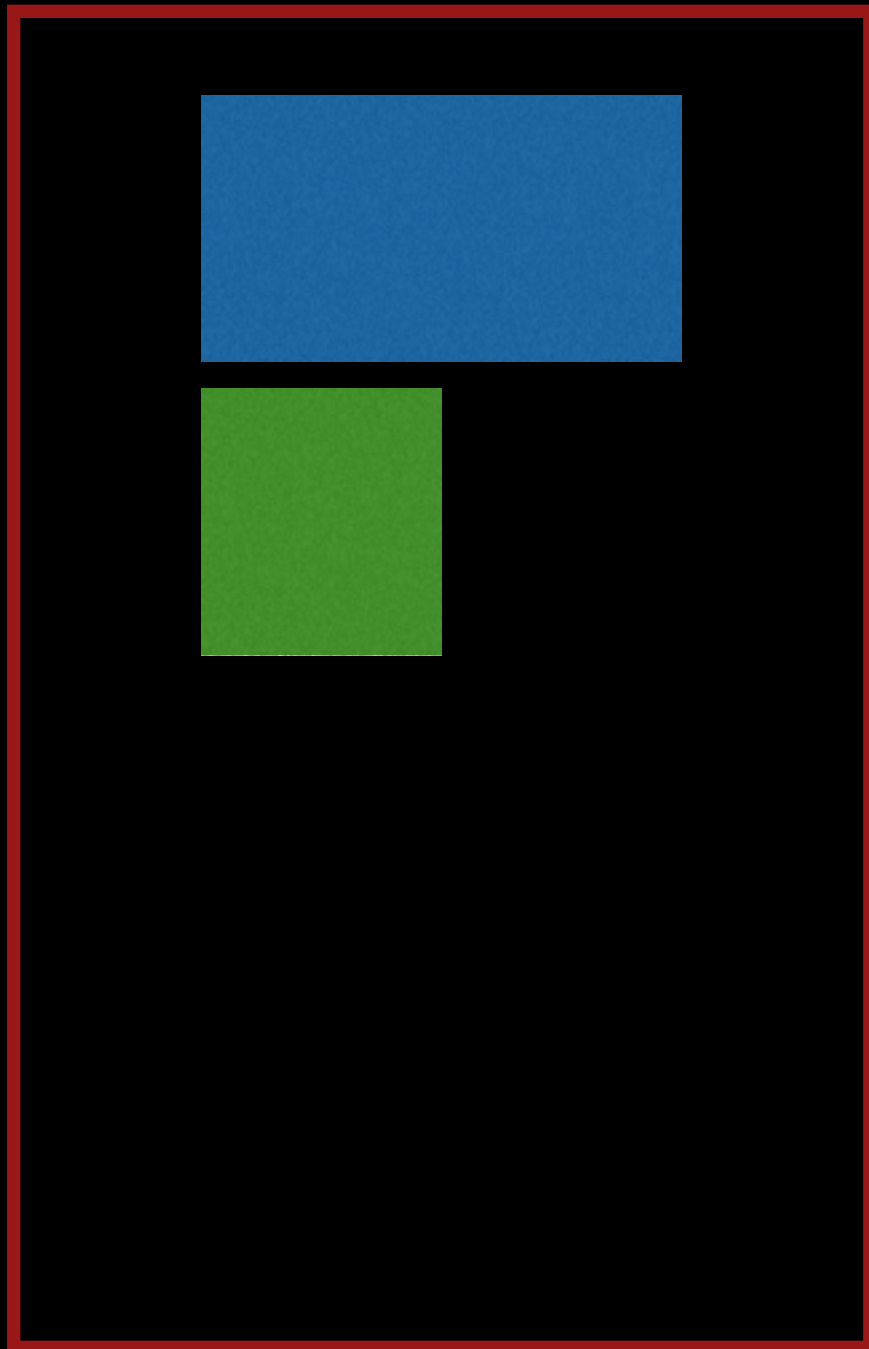

pointers, the memory addresses of each textfield object

What is the value of containsNumbers after the if statement?

```objc
NSCharacterSet *set = [NSCharacterSet characterSetWithCharactersInString:@"0123456789"];
NSString *aString = @"101 S. Garland Ave.";
BOOL containsNumbers = YES;

if ([aString rangeOfCharacterFromSet:set].location == NSNotFound)
{
    containsNumbers = NO;
}
```

containsNumbers = YES after if statement is evaluated

What auto layout rules would you need to place greenView where it is onscreen?

greenView Constraints
* vertical spacing
* align leading
* equal height
* proportional width (50%)
